

AGENT RESOURCE GUIDE / Q4 2026

Getting started with social media brand advertising.

You don't need to be perfect.
You need to be present.

Start small. Build confidence.

You don't need to be perfect — you need to be present.

The agents who win on social media aren't the most polished. They're the most consistent. A shaky phone video of a neighborhood coffee shop posted every week will outperform a professionally edited listing video posted twice a year. Start small, post regularly, and get comfortable on camera at your own pace.

STEP 1 / GET COMFORTABLE BEFORE YOU GO LIVE

01

Setup your profiles first

Before posting anything, complete your bio on every platform. Use the same headshot, include your market area, and link to your website or CINC landing page.

Do this in one afternoon

02

Film yourself talking — don't post it

Practice recording 30-second videos on your phone in your car, at a listing, or walking a neighborhood. Just get used to speaking to a camera. Watch them back, delete them. Repeat for a week.

Private practice builds confidence

03

Start with photos and carousels

Photos are lower-pressure than video. Your first real posts can be neighborhood photos, a just-sold graphic, or a "5 things I love about [area]" carousel. No talking required.

Instagram and Facebook first

04

Introduce yourself with one simple video

When you're ready, film a 30-second intro: your name, where you work, and one thing you love about your market. This becomes your pinned post. It doesn't have to be perfect.

Week 2 or 3 goal

Pick the platforms that feel right for you.

Instagram

[Start here](#)

The most forgiving starting platform. Photos, carousels, and Stories give you options at every comfort level. Reels (short videos) unlock the biggest reach when you're ready.

YOUR FIRST POST IDEA:

"This is the neighborhood I work most. Here are 3 things most people don't know about it." — 5 photos as a carousel.

Facebook

[Start here](#)

Your existing network is already here. Just-sold, market updates, and community group posts reach people who already know you — the warmest possible audience for referrals.

YOUR FIRST POST IDEA:

"Just closed on a home in [neighborhood]! Congrats to my clients — they beat out 3 other offers. Thinking about selling? Let's talk."

TikTok

[When comfortable on camera](#)

Biggest organic reach potential of any platform. Great for neighborhood tours and quick market takes. The algorithm doesn't penalize new accounts — you can get traction fast.

YOUR FIRST POST IDEA:

Walk into a coffee shop you love and say: "If you're moving to [city], this is the neighborhood I'd tell you to look at first — here's why."

YouTube

[Add after 60 days](#)

Your long-form content library. A 5-minute neighborhood guide posted today will show up in Google searches for years. Upload your TikTok videos as YouTube Shorts for free reach.

YOUR FIRST VIDEO IDEA:

"Living in [neighborhood]: what locals actually think." Drive around and talk for 5 minutes. No editing needed.

Five caption formulas you can use right away.

01 The neighborhood hook

"Most people don't know this about [neighborhood name] — [surprising or interesting local fact]. That's why my clients keep moving here. What questions do you have about [city/area]?"

02 The just-sold social proof post

"Officially closed! My clients were [first-time buyers / relocating from X / upsizing for a growing family] and we found them the perfect home in [neighborhood] in [X days]. Ready to do the same? DM me or visit [link]."

03 The quick market update

"[Month] market update for [city]: Homes are selling in an average of [X] days. Inventory is [up/down] compared to last year. What this means for buyers: [one sentence]. For sellers: [one sentence]. Questions? Drop them below."

04 The community spotlight

"If you're new to [neighborhood], your first stop should be [local business name] on [street]. [One sentence about why you love it.] This is the kind of place that makes [city] feel like home — and it's exactly why my clients keep choosing this area."

05 The relatable agent moment

"Showing 6 homes today in [neighborhood]. Here's what I'm watching for in this market: [2-3 honest observations]. The market is [adjective] right now — here's what buyers and sellers need to know heading into Q4."

Engagement

Make your content work harder.

Repurpose everything

Every TikTok video can also be an Instagram Reel and a YouTube Short. Film once, post three places. Takes 5 minutes extra.

Tag local businesses

When you spotlight a restaurant, shop, or venue, tag them. They often reshare to their own audience — free reach you didn't have to earn.

Post when people scroll

Tuesday–Thursday, 7–9am or 5–7pm, consistently outperforms. Weekday mornings on Instagram and Facebook. Evenings on TikTok.

Always end with a question

Comments signal to every algorithm that your content is worth showing more people. "What questions do you have?" costs nothing and drives reach.

THE TAKEAWAY

Show up. Be useful. Stay consistent.

Choose a manageable starting point, keep the content grounded in your community, and use the Q4 calendar as a repeatable guide rather than a requirement to be perfect.
